PROFESSIONAL SUMMARY

Software Engineer with 6+ years of experience building and scaling backend systems. Experienced in designing reliable services for complex business workflows, with frontend experience and the ability to work across the stack to deliver end-to-end solutions.

SKILLS

Languages : Java, Typescript, Javascript, Python, SQL, HTML, CSS

Frameworks : Spring Boot, React

Cloud Technologies : Amazon Web Services (AWS), Oracle Cloud Infrastructure (OCI)

Devops : Docker, Kubernetes, Jenkins

Observability : Prometheus, Grafana, OpenSearch

Databases and Messaging : Postgre, OracleDB, Redis, Apache Kafka

EXPERIENCE

Lead Product Engineer

Nov. 2024 – Present

IBS Software

Bengaluru, India

- Developed and maintained microservices for **airline offer curation**, handling fare proration, tax computation, rule execution, and offer orchestration to deliver optimal offers to customers for **iRetail OOSD platform**.
- Architected and implemented an **Offer Lifecycle Manager** microservice to cache, retrieve, and validate offers shared with customers, ensuring consistency across downstream services such as order management and validation systems.
- Analyzed and optimized distributed cache population strategy using **Oracle Coherence IMDG**, reducing cache warm-up time from **40 minutes to 10 minutes (75% improvement)**, significantly improving **low-fare calendar** load times for airline booking platforms.
- Designed **reusable Maven modules** to eliminate duplicated functionality across the organization, including;transformer module for converting airline NDC offer requests across versions, connector module to integrate with legacy Passenger Service Systems (PSS).
- Designed and built a microservices-based data ingestion pipeline to process and aggregate **1 million+ ATPCO tax records**; implemented transformation logic to convert processed data into **Drools-based rules** for accurate and efficient tax calculation during offer generation.
- Led a team of 3 engineers to resolve critical issues and optimize performance in flight availability, fare generation, and tax computation modules within the **iFly RES Passenger Service System**.

Senior Applications Engineer

Aug. 2021 – Nov. 2024

Oracle India

Trivandrum, India

- Developed and maintained **Site Data Collector** service using Spring Boot to ingest and process usage data from **Oracle RightNow Service, Oracle Intelligent Advisor, and Oracle Knowledge Advanced** by creating high-throughput data pipeline using Apache Kafka, enabling efficient streaming of usage data from **2,800+ sites** into Oracle Autonomous Data Warehouse (ADW).
- Created a **Multi-Channel Oracle Digital Assistant** chat application that serves product usage metrics reports to analysts. Built the **backend service** for the bot by leveraging the Oracle Bots Node.js SDK (TypeScript) to generate dynamic **PDF, PPT, and XLSX** reports. This significantly improved operational efficiency reduced customer metrics/report generation effort from **3 days to 4 hours**, enabling business analysts to focus on higher-value analytical tasks.
- Architected a reusable **report generation framework** using PPTXgenJS, enabling scalable design and implementation of report templates for multiple Oracle products that reduced processing time from **60 seconds to 10 seconds (6x improvement)**.
- Delivered custom **browser UI enhancements** for Oracle RightNow Service customers using the Agent Browser UI Extensibility Framework and Oracle JET (OJET).

Software Engineer

RCKR Software

Aug. 2020 – Aug. 2021

Thrissur, India

- Led technical architecture discussions with the product team for designing **custom SSO service** for FHIR service.
- Implemented SSO service based on **OAuth 2.0** standards using .NET Core framework.
- Worked on customer requirements and bug fixes for health platform which is developed using .NET Framework and Angular.

EDUCATION

Government Engineering College, Thrissur

Aug. 2016 – Jul 2020

B.Tech in Computer Science and Engineering (Honours)

- Secured B.Tech with honours with an aggregated CGPA of 8.54/10

AWARDS & RECOGNITIONS

Oracle CX Service Spotlight Theme Award

- For the contributions to the team and collaborative efforts made for developing Casper and Site Data Collector Project.

Oracle CX Service Showcase hackathon win

- For the top 7 best Oracle Rightnow service Agent UI customizations
